Summary

Platform & Infrastructure Software Engineer with 4+ years of experience building client-data platforms, distributed systems, microservices, and deployment automation at enterprise scale. Leverages backend engineering, infrastructure automation, observability, and data-driven decision making to modernize company platforms and improve system reliability.

SKILLS

- **Programming Languages:** Python, C#, Java, C++, C, R
- **Development & Frameworks:** .NET, FastAPI, ReactJS, Node.js, Flask, HuggingFace
- **Data Analysis & Machine Learning:** Pandas, NumPy, scikit-learn, TensorFlow, XGBoost, Matplotlib, ML/AI Pipelines-, Data-Standardizing, Data-Visualizing, Image-Processing
- **Databases:** SQL, MongoDB, PostgreSQL
- **Cloud & DevOps:** AWS, Linux, Terraform, Automation, Apache Spark, Docker

WORK EXPERIENCE

FactSet Research

Jul 2022 - Jun 2026

Platform & Infrastructure Software Engineer

New York City, NY

- Owned design and operation of a large-scale distributed file storage platform (C#, .NET, C++, SQL) exposing high-throughput REST APIs powering vital enterprise workflows across FactSet products
- Led development of a self-service client data migration platform enabling secure cross-firm data consolidation with automated integrity validation, eliminating ~10 hours/week of operational overhead across 5 engineering teams
- Architected a high-throughput data quality platform processing up to 1 TB/hour across AWS S3 and SQL storage systems, ensuring data integrity and operational reliability for client-data workflows
- Engineered a resilient multi-region infrastructure solution that improved platform scalability and fault tolerance while reducing client-data migration execution time by 23% across ~20 annual enterprise migrations
- Led redesign of deployment orchestration for a distributed relational database platform spanning 1,000+ database nodes and hundreds of client databases, modernizing CI/CD workflows, deployment scheduling, and versioning
- Developed an event-driven deployment calendar and visualization platform integrated directly with release workflows, improving deployment transparency and stakeholder coordination across platform engineering teams
- Built cost-attribution analytics pipelines and data-lake reporting solutions in Databricks using operational telemetry and platform usage data, enabling engineering leadership to improve infrastructure visibility and guide investment decisions
- Developed ML-assisted observability tooling using Python, Pandas, scikit-learn, and decision-tree classifiers to analyze production logs and infrastructure logs, enabling rapid identification of memory bottlenecks and system constraints
- Automated release risk assessments and stakeholder-ready summaries by developing an AI-assisted engineering copilot using Python, OpenAI APIs, GitHub Actions, and SQL to analyze deployment metadata, infrastructure dependencies, and operational logs

RWJ Hospital AI Research

Jul 2024 - Jan 2025

Data Scientist Intern

New Brunswick, NJ

- Designed medical imaging preprocessing and radiomics feature-extraction pipelines using PyRadiomics, NumPy, and Pandas, improving dataset quality for CNN-based clinical AI models achieving ~97% precision/recall and advancing early disease detection research

ADP, LLC

Jun 2021 - Aug 2021

ML Engineering Intern

Roseland, NJ

- Architected and deployed an in-house BERT-based NLP document-processing platform that automated classification and metadata extraction for 5,000+ weekly uploads, replacing a third-party solution, reducing costs, and removing a critical ADP bottleneck

EDUCATION

University of Pennsylvania

Aug 2025 - Dec 2026

M.S. in Data Science

- **Achievements:** Selected for interdisciplinary graduate program spanning ML/AI systems and large-scale data infrastructure to bridge the gap between data and healthcare.
- **Coursework:** Applied Machine Learning, Distributed Systems, Product Design, Artificial Intelligence, NLP, Big Data

New Jersey Institute of Technology

B.S. in Computer Science, Minor in Applied Statistics

- **Achievements:** 4x Dean's List Recognition, 2020 PMINJ Scholarship, All-Academic AKSi
